

# "Run `npm audit` for more detail " warning

In npm version 6.0.0, executing the `npm install` command reports this message:

3

up to date in 13.576s  
[!] 52 vulnerabilities found [15904 packages audited]  
Severity: 8 low | 40 moderate | 4 high  
Run ``npm audit`` for more detail

Why does this appear, and how can it be disabled?

npm-install

Try running `npm audit` – Ry- ♦ May 12 '18 at 7:25

## 1 Answer

It's a new feature, introduced with `npm@6`. It shows all vulnerabilities your dependencies got (excluding `peerDependencies`)

9

You can disable the warning for single package installations with the `--no-audit` flag.

To deactivate it for all installations you can execute `npm set audit false`
