Bug Report

- TSLint version: 3.15.1
- TypeScript version: 2.0.3
- Running TSLint via: grunt-tslint

TypeScript code being linted

```
interface PollLinkOptions {  
  account: { domain: string },  
  poll: { uid: string },  
  emailToken: string  
};
```

Milestone

No milestone

```
{
  "rules": {
    "semicolon": [
      true,
      "always"
    ]
  }
}
```

Actual behavior

```
(semicolon) routes/links.ts[2, 30]: Missing semicolon
(semicolon) routes/links.ts[3, 24]: Missing semicolon
(semicolon) routes/links.ts[4, 20]: Missing semicolon
```

Expected behavior

Should not be treated as an error.

jeffcressman commented on Dec 15, 2016

@nonplus was having the same issue and stumbled across the tslint option `ignore-interfaces`, which would give you a configuration of

```
{
  "rules": {
    "semicolon": [
      true,
      "always",
      "ignore-interfaces"
    ]
  }
}
```

Picked it up from here <https://palantir.github.io/tslint/rules/semicolon/>

Collaborator

Awesome, looks like this is fixed! 🎉
