

What to include in configuration of tslint.json?

Asked 3 years, 6 months ago Active 6 months ago Viewed 23k times

▲ I don't know which rule should be included in `tslint.json` . Can anyone show me the common or standard use of `tslint.json` ?

2 configuring it depends on what you want to achieve. you can generate a default one using `tsc --init` – [toskv](#) Feb 23 '16 at 22:06

8 @toskv You probably mean `tslint --init` . – [Fidan Hakaj](#) Feb 23 '16 at 23:43

Yes. That's exactly what I want as I don't want to type all the rules by myself. – [Ng2-Fun](#) Feb 24 '16 at 4:25

@FidanHakaj indeed thanks for catching that. :) – [toskv](#) Feb 27 '16 at 18:14

The Docs: <https://palantir.github.io/tslint>

Here is an example `tslint.json` : <https://palantir.github.io/tslint/usage/configuration/>

You would only use the rules that you care about: <https://palantir.github.io/tslint/rules/>

By using our site, you acknowledge that you have read and understand our Cookie Policy, Privacy Policy, and our Terms of Service.

```
{  
  "rules": {  
    "no-unreachable": true  
  }  
}
```

- 2 I'm not sure of the quality of the sample configuration functionally. You could also try github.com/palantir/tslint/blob/master/tslint.json or github.com/Microsoft/TypeScript/blob/master/tslint.json. Note that TypeScript uses some custom rules, so you'll need to grab those from their repo as well or just delete them from the config. – JKillian Feb 24 '16 at 22:05
-
- 2 Here is an example straight from the docs : <https://github.com/palantir/tslint/blob/master/docs/sample.tslint.json> -> link is dead :-/ – Y-B Cause Jun 17 '17 at 10:54
