

Angular 2 import statement wildcard syntax

I defined several classes in one file like this

3

my.classes.ts

```
export class Class1 {...}
export class Class2 {...}
export class Class3 {...}
```

1

Now I want to import them all using wildcard like this

```
import {*} from './my.classes';
```

It showed syntax error.

What is the correct syntax to import * from a module?

typescript

Here you go,

7

```
import * as MyClasses from './my.classes';
```

```
MyClasses.Class1 ....
```

Hope this helps!!
