

Angular 6: Property 'map' does not exist on type 'Observable<Response>'

▲ Property 'map' does not exist on type. I am Trying to import 'rxjs' module different way but it does not work.

2

```
import 'rxjs/add/operator/map';
import 'rxjs/add/operator/catch';

list(){
  return this.http.get(endpoint)
    .map(response=>response.json())
    .catch(this.handleError)
}
```

▲ Since it is Angular 6, you're using RxJS in its 6th version.

9 This is the RxJS 6 way for what you want to do:

```
map(response=>response.json()),
catchError(this.handleError)
)
}
```

In angular 6 you don't have to call `.json()` because it's done implicitly so this sample is wrong and you don't need `map` at all, but it's just to show you the equivalent for `.map()` in RxJS 6

Note you should also use `catchError` operator instead of `.catch` . – [Martin Adámek](#) Sep 23 '18 at 17:15

Indeed [@MartinAdámek](#) fixed – [Twisting nether](#) Sep 23 '18 at 17:16

Open your terminal and just command this

-1

```
npm install --save rxjs-compat
```

or

```
npm install --save rxjs-compat@6
```

or

```
npm i rxjs-compat --save-dev
```

I hope your problem will be fixed.
