node_modules/rxjs/internal/types.d.ts(81,44): error TS1005: ';' expected error after installation of Angular 6

I got an error of `node_modules/rxjs/internal/types.d.ts(81,44): error TS1005: ';' expected.` after the installation of Angular 6.

95

Check the error:

```
ERROR in node_modules/rxjs/internal/types.d.ts(81,44): error TS1005: ';' expected.
node_modules/rxjs/internal/types.d.ts(81,74): error TS1005: ';' expected.
node_modules/rxjs/internal/types.d.ts(81,77): error TS1109: Expression expected.
```

1   please add some code in which you are getting this error – TheParam Feb 5 at 6:49

1   Hello @TheParam , I am getting error after the installation. I havn't done any code in it yet. – SSP Feb 5 at 6:53

1   In Angular 6 required version of rxjs is 6.0.0 so please check below answer. it will help – TheParam Feb 5 at 6:57

stackoverflow.com/a/54529119/9741113 this solved my problem, but now I can't import nothing from – Nikola Jun 25 at 8:40

This problem might arise due to version mismatch. To solve your problem you need to do following changes in your **package.json** file.

There is no need to change the typescript version. (Mine: `"typescript": "~2.7.2"`)

Edit: If you are using `rxjs-compat` then you also need to do following in order to fixed the issue. change the `rxjs-compat` version from `"rxjs-compat": "^6.2.2"` to `"rxjs-compat": "6.2.2"`

Hope this will help!

2   @SSP You should read how npm specify package versions. docs.npmjs.com/files/package.json#dependencies – NechiK Feb 5 at 7:56 ✎

6   ^ operator use to get latest version of the library if available – TheParam Feb 5 at 8:04

1   Should we add an issue for angular 6? – Michael Czechowski Feb 6 at 13:25

2   acutally someone already did that here is link github.com/ReactiveX/rxjs/issues/4511 – TheParam Feb 6 at 13:29

   Worked for angular 4 project ! – Sagar Khatri Feb 8 at 10:22

I had the same error using angular 6 having rxjs@6.4.0 but i downgraded it to rxjs@6.3.3 it worked.

Thanks, this worked for me. I did clear rxjs and rxjs-compat from node_modules and downgraded the version then did npm install. Just to be sure that i am on right version. – Swapnil Mar 13 at 7:10

You need to do some changes in `package.json`

If you are using rxjs-compat then you also need to do following in order to fixed the issue. change the rxjs-compat version from

```
"rxjs-compat": "^6.2.2"
```

to

```
"rxjs-compat": "6.2.2"
```

This works for me

I just needed to edit the file and add the semicolon at the final line after O as shown here:

Go to the path `[project directory]/node_modules/rxjs/internal` and open the file `types.d.ts` as administrator, move to the final of the file and add a semicolon.

Original code: `export declare type ObservedValueOf<O> = O extends ObservableInput<infer T> ? T : never;`

Modified code: `export declare type ObservedValueOf<O> = O; extends ObservableInput<infer T> ? T : never;`

Earlier, I used to fix the problem with @TheParam's answer but lately started using yarn. Sadly I could not find yarn equivalent of

1

```
nmp update
```

I tried using

```
yarn upgrade
```

(although it is not equivalent of above command afaik) and it did not help.

I instead used

```
yarn add rxjs@6.0.0
```

and it worked. It took considerable time 82 sec as compared to few seconds in case of npm but fixed the issue. my node 8.11.2 and yarn 1.15.2

Go to the project directory run this command

1

npm install rxjs@6.0.0 --save

2. change the typscript version to 2.8

3. run npm install

This will work for you!

0

I had the same issue, the "rxjs": "^6.0.0" to "rxjs": "6.0.0" didn't work. I had to update my angular CLI to last stable `npm install -g @angular/cli` and regenerate the project again.

My config now is :

```
Angular CLI: 7.3.6
Node: 10.15.3
OS: win32 x64
Angular: 7.2.9
```

0

I had same problem npm install typescript@2.8.0 solved my problem
