Grave accent in directive template

I have some directive in angular which can be called

▲

1

```
<div some-directive parameter='{"option":"value"}'>...</div>
```

▼

i need to use this directive in another directive template. I'm trying to use the grave accent

★

```
template:
'<div some-directive parameter=`{"region":"33"}`> ... < /div>',
```

but i got

```
SyntaxError: Unexpected token `
```

How can i call another directive with parameters? I tried using \' or more " but it doesn't work. I also can't change directive which i'm trying to call.

Sorry for my english ;)

angularjs   angularjs-directive
