How to print an array in comma separated string in angular html

Asked 1 year, 4 months ago   Active 1 year, 4 months ago   Viewed 11k times

I have to display a parse an array inside a json in HTML:

7

```
<p class="personaType">{{cardData.names}}</p>
```

where names is

```
names: Array(5) 0:"Person" 1:"Artist" 2:"Performing Artist" 3:"Production Artist"
4:"Visual Artist" 5:"Intermedia Artist"
```

I want to display names as:

> Person, Artist, Performing Artist, Production Artist

Right now it is displaying as (without space):

> Person,Artist,Performing Artist,Production Artist

Is there any inbuilt pipe available in angular which can be used to display such data?

angular   angular-pipe

                                              Harsimer
                                              1,213   6   22   58

1 Answer

24

```
<p class="personaType">{{cardData.names.join(', ')}}</p>
```

This will print all the elements in the array, separated by a comma and a white space.

1	bugs Thanks For quick help! It worked. – Harsimer May 23 '18 at 11:34 ✎
2	Glad it helped. Note that this is not specific to Angular, is just a standard JS array method – bugs May 23 '18 at 11:35
	Yes I can understand that. but it is not a hack? right? it is a right way to do it? – Harsimer May 23 '18 at 11:49
1	@Simer it's definitely not a hack – bugs May 23 '18 at 11:50
1	@Simer not a hack, the provided answer is correct – Christian Benseler May 23 '18 at 11:51
